#### Safety precautions

Read this manual and the safety precautions carefully before use. Explain their contents to your children, and the potential hazards associated with using the telephone.

Only use the mains unit supplied.

Fit only the approved rechargeable battery pack! Never use a conventional (non-rechargeable) battery pack as this could damage your health and cause injury. Use the battery pack as directed in these instructions (page 7).

The operation of medical appliances may be affected. Be aware of the technical conditions within the particular environment (e.g. doctor's practice).

The handset may cause an intrusive 'hum' in hearing aids. Do not hold the handset against your ear while it is ringing (incoming call).

Do not install the phone in a bathroom or shower room as the handset and base are not splash-proof. (page 7)

Do not use the telephone in environments subject to explosion hazard (e.g. auto paint shops).

If you give your Gigaset to someone else, make sure you also give them the operating manual.

Dispose of the battery pack and telephone in accordance with environmental regulations. Do not pollute the environment.

Emergency numbers cannot be dialled if the keypad lock (page 3) is activated!

Not all of the functions described in this manual are available in all countries.

#### Setting up the telephone for use

#### Step 1: Connecting the base

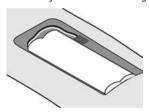

Connect the phone jack with the phone cord ① and the mains units (230 V) with the power cord ② as shown. Place the cords in the cord recesses. The two cords must be plugged in at all times.

- ◆ Use **only the mains unit supplied** (see the bottom of the base).
- ◆ If you ever purchase another phone cord from a store, ensure that the phone conductors are correctly connected: 3-4 connection of the telephone conductors/EURO CTR37.

#### Step 2: Setting up the handset

#### Fitting the battery pack

- ♦ Fit the plug into the socket.
- ◆ Insert the battery (see diagram below).
- Place the battery leads in the cable guides.

#### Closing the battery cover

Place the cover on the battery compartment as shown in the diagram, then push it up until it snaps into position.

#### Opening the battery cover

Press down on the battery cover below its upper end and slide the cover down.

- ◆ Only insert the recommended rechargeable **battery pack**, i.e. never use a normal battery pack as this could damage your health and cause injury.
- ◆ Never use non-Siemens battery chargers as this could damage the battery pack.
- ◆ Only place the handset in the base/ charging cradle that is intended for it.

### Step 3: Registering the handset to the base and charging the battery pack

Place your handset in the base with the **display facing forwards**. The handset will now register **automatically** to the base. For procedure see page 5.

#### Charging the battery pack

To charge the battery pack, leave the handset in the base for approx. ten hours. The battery pack is now fully charged. The charge status of the battery pack is correctly displayed only after uninterrupted charging/discharging. You should not therefore interrupt the charging process.

Charging is electronically controlled to prevent overcharging. The battery pack heats up during charging; this is normal and not dangerous. After a time the charge capacity of the pack will decrease for technical reasons.

You must set the date and time to ensure that the times of calls are logged correctly (page 8). Your telephone is now ready to use.

#### Activating/deactivating the handset

Press the 'end call' key 🛜 and hold.

If you place a deactivated handset in the base station or charger, it will automatically activate.

#### Activating/deactivating the keypad lock

You can "lock" the keys on the handset to protect the keypad against inadvertent activation.

To activate: press the hash key # and hold. The display shows the icon →.

To deactivate: press the hash key # and hold. The keypad lock deactivates automatically when you receive a call and activates again after the call. When the keypad lock is active you cannot even call emergency numbers!

#### Making calls

#### Making external calls/Ending a call

External calls are calls using the public telephone network.

(Enter the number)  $\rightarrow$  (.

The number is dialled. (Or you can **first** press **/** [dial tone] and then enter the number.) During the call you can adjust the earpiece volume with **†** and **↓**.

#### End the call/cancel dialling:

Press the end call key 🛜 .

You can automatically insert a network provider prefix before any number (see Menu Tree, PRESELECT, page 8).

#### Answering a call

Your handset rings and you wish to take the call: Press the talk key  $\boldsymbol{C}$ .

If "Auto Answer" is active (page 6) just lift the handset out of its base/charging cradle.

#### **Calling Line Identification**

When you get a call, the caller's number will be displayed on your handset; the caller's name will be displayed if it is stored in the directory.

#### Requirements:

- 1 You have asked your network provider for the caller's number (CLIP) to be displayed on your handset screen.
- 2 The caller has asked the network provider for his number to be identified (CLI).
- 3 To receive a 2nd call while talking, press the key **R** to toggle between the 1rst caller and the 2nd caller.

The display shows (\(\chi\_{\textstyle}\)) if you have not requested CLIP, \(\mathbf{WITHHELD}\) if the caller has withheld CLI, or \(\mathbf{UNAVAILABLE}\) if it has not been requested.

#### Muting

You can mute you handset when making external calls. The other party hears a wait melody. You do not hear your caller either.

Press the display key **INT**. The call is 'held' (wait melody).

To cancel the function: Press 🕝 briefly.

### Using the directory and other lists

#### Directory and speed dial list

These two lists are used in the same way.

To open the directory: Press Ⅲ.

To open the speed dial list: Press •�.

**Directory**: Can store up to 20 numbers and associated names.

**Speed dial list:** Can store up to 8 numbers (12 digits max.), e.g. private phone numbers, prefixes of network providers ("Call-by-Call") etc.

Press the ☐ or ❖ key to open the required list then press **MENU**. The following functions are available:

#### Calling back a caller from the calls list:

 $\longrightarrow$  Select an entry  $\rightarrow$   $\nearrow$ .

### Registering and de-registering handsets

You can register up to four handsets on your base station.

A Gigaset A14handset that is not yet registered on a base is registered **automatically**. Other handsets must be registered **manually**.

### Automatic registering: Gigaset handset A14

Any Gigaset A14handset that is not registered to a base can be registered automatically. To register a handset for the first time, place it in the base with the **display facing forward**. Registering takes about 1 minute; a number of icons flash in the display. The handset is **automatically** assigned the next available internal number (1–4). This number appears in the top left of the display after successful registering, e.g. "2". If all of the internal numbers 1 to 4 are used up (i.e. four handsets have been registered), handset number 4 is de-registered and overwritten.

#### Manual registering: Gigaset handset A14

- 1. On the handset: MENU → REGISTER HS → enter your system PIN (default is 0000) → OK. The display shows REGISTER HS during the registration procedure.
- 2. On the base: Within 60 sec. of entering the system PIN, press the register/paging key on the front of the base (page 1) and hold for approx. 3 sec. The registration process starts.

#### Manual registering: Other handsets

Other handsets are registered as follows:

- **1. On the handset:** Start to register your handset as described in its operating instructions.
- **2. On the base:** Press the register/paging key on the front of the base (page 1) for approx. 3 sec. The registration process starts.

#### De-registering handsets

You can de-register another handset from any registered Gigaset A14handset as follows:

INT → Select handset → MENU →
DE-REG H/SET → OK →
Enter the system PIN (default is 0000) → OK →
DE-REGISTER? → OK → ...

The internal number disappears from the de-registered handset. Handsets that have not been deregistered retain their internal number.

#### Using several handsets

#### Internal calls

Internal calls are no-cost calls to other handsets that are registered to the same base.

INT	Press the display key. Your own handset is marked "<".			
either	Call a single handset:			
ÖII	Enter number of handset, e.g. <b>2</b> .			
or	Calling all handsets:			
*	Press the star key.			
then	Ending the call:			
<b>⊙</b>	Press the end call key.			

#### Internal conference/Call connecting

You are in conversation with an **external** caller. To confer:

**INT** (the external party hears the wait melody) → Select a handset → (confer with internal party).

End: MENU → GO BACK → OK.

You are reconnected with the external caller. Or to connect the call:

INT → Select a handset → (announce the call if required) → • Press the end call key. You can also press the end call key • immediately (without announcing the call). If the internal party does not answer or is busy the call will come back to you automatically.

#### Barging in on an external call

You are conducting an external call. An internal party can 'barge in' on your call and join in the conversation (all parties hear a beep). **Requirement:** The **BARGE IN** function is activated.

Activating/deactivating internal barge-in

MENU → BASE SET → ADD FEATURES →

BARGE IN (✓ = on).

#### Internal barge-in

The display shows **LINE IN USE**. You wish to barge in on the call.

Press the talk key.

You are connected. All parties hear a signal tone. The display shows **LISTENING IN**.

End: The Press the end call key.

If one of the internal parties presses the end call key , a signal tone sounds. This does not affect the connection between the other handset and the external caller.

#### Looking for a handset ("paging")

If you have mislaid your handset you can page it with the help of the base. To do this, **briefly** (2 seconds max.) press the register/paging key on the front of the base (page 1). All handsets will ring at the same time.

End paging: **Briefly** press the registration/paging key (on the base) or the talk key **(** on any handset.

Pressing the registration/paging key for more than 2 seconds puts the base into registration mode. The handsets will not ring in this case.

#### Handset settings

#### Changing the display language

You can view the display texts in different languages.

MENU → 9 2 → Select language

(e.g. digit combination  $\bf 01$  for German):

0 1	German	0 6	Spanish
0 2	English	0 7	Portuguese
0 3	French	0 8	Turkish
0 4	Italian	09	Greek
0 5	Dutch		

#### Activating/deactivating Auto Answer

When you get a call you can simply lift the handset out of the base or charger without having to press the talk key  $\mathcal{L}$ .

To activate: MENU → 9 1 1.
To deactivate: MENU → 9 1 0.

### Activating/deactivating battery warning tone

If this function is activated, a beep sounds in idle status when the battery pack is almost flat.

To deactivate: MENU  $\rightarrow$  9 4 0. To activate: MENU  $\rightarrow$  9 4 1.

#### Resetting the handset

Restoring the factory settings of the handset will **not** affect entries in the directory, the calls list or the speed dial list or the handset's registration to the base.

MENU  $\rightarrow$  93  $\rightarrow$  RESET?  $\rightarrow$  OK.

#### Base station settings

#### Changing pause after line seizure

You can change the length of the pause that is inserted between pressing the talk key 
and sending the number:

**MENU** → 8916 → The digit for the current pause length flashes: 1 = 1 sec.; 2 = 3 sec.; 3 = 7 sec.; 4 = 2.5 sec. → Enter digit → **OK**.

### Changing the pause after the Recall key (dial pause)

You can change the length of the dial pause if your PABX requires this (refer to the operating instructions of the PABX):

**MENU**  $\rightarrow$  8 9 1 2  $\rightarrow$  The digit for the current pause length flashes: 1 = 800 ms; 2 = 1600 ms; 3 = 3200 ms  $\rightarrow$  Enter digit  $\rightarrow$  OK.

To insert a dial pause: press  ${f R}$  for 2 seconds. A "P" appears in the display.

#### **Appendix**

#### Character set chart

Press the required key the number of times indicated.

#### Care

Wipe the base station and handset with a **damp cloth** or an antistatic wipe. **Never** use a dry cloth! This can cause static!

#### Contact with liquid /!

If the handset has come into contact with liquid:

- 1 Switch the handset off and remove the battery pack immediately.
- 2 Allow the liquid to drain from the handset.
- 3 Pat all parts dry, then place the handset with the battery compartment open and the keypad facing down in a dry, warm place for at least 72 hours (not in a microwave, oven etc.).
- 4 Do not activate the handset again until it is dry.

When it has fully dried out you will normally be able to use it again.
